GoGold Announces Filing of Technical Report for Initial Mineral Resource Estimate at Los Ricos North

Halifax, NS – GoGold Resources Inc. (TSX: GGD) (OTCQX: GLGDF) (“GoGold”, “the Company”) is pleased to announce the filing of a National Instrument 43-101 Technical Report and Initial Mineral Resource Estimate (the “Technical Report”) for their Los Ricos North Project located in Jalisco State, Mexico. The highlights of the Technical Report were previously announced in a news release dated December 7, 2021, and the effective date of the Technical Report is December 1, 2021.

Highlights of the Mineral Resource Estimate:

- Indicated Mineral Resource at Los Ricos North of 87.8 million ounces silver equivalent (“AgEq”) grading 122 g/t AgEq contained in 22.3 million tonnes (“Mt”) (Table 1)
- Inferred Mineral Resource at Los Ricos North of 73.2 million ounces AgEq grading 111 g/t AgEq contained in 20.5 Mt (Table 1)
- Sensitivity analysis of pit constrained Mineral Resources at higher cut-off of 50 g/t AgEq show an Indicated Mineral Resource of 80.3 million ounces AgEq grading 147 g/t AgEq and an Inferred Mineral Resource of 60.7 million ounces AgEq grading 129 g/t AgEq (Figure 1) (Table 2)
- Los Ricos North Mineral Resource is calculated as a pit constrained Mineral Resource forming 96% of the Mineral Resource Estimate, with 4% being out-of-pit Mineral Resource (Indicated 0.9 million ounces AgEq grading 163 g/t AgEq and Inferred 6.4 million ounces grading 178 g/t AgEq)
- Total Los Ricos Measured & Indicated Mineral Resources of 151.5 million ounces AgEq (Table 3)
- Total Los Ricos Inferred Mineral Resource of 93.1 million ounces AgEq (Table 3)
- Total Company Measured & Indicated Mineral Resources of 187.5 million ounces AgEq (Table 4)
- Total Company Inferred Mineral Resources of 93.1 million ounces AgEq (Table 4)
- In Los Ricos North, an additional 100,000 metres of exploration drilling targeting additional Mineral Resource ounces is planned for 2022

“The initial Mineral Resource Estimate at Los Ricos North represented the first 100,000 metres of drilling at Los Ricos North, and established the Los Ricos District as a very significant project in the silver industry. Combining Los Ricos North and South, the district shows a Measured and Indicated Mineral Resource of 151 million ounce AgEq and an Inferred Mineral Resource of 93 million ounces AgEq,” said Brad Langille, President and CEO. “This year, we’ve begun our next 100,000 metres of drilling which is primarily focused on continued expansion of the Mineral Resources. We look forward to many more excellent drilling results, particularly at El Favor East, Mololoa, and our new Gran Cabrera target, which we recently began drilling. We anticipate that in 2022 we will continue to grow the ounces in the Los Ricos District significantly as we did in 2021.”

The Los Ricos North Mineral Resource Estimate by deposit is provided below in Table 1.

Table 1: Los Ricos North Mineral Resource Estimate ⁽¹⁻¹¹⁾

Deposit	Tonnes	Average Grade							Contained Metal

Total Inferred	20.5						1.51	111	148	49,019				992	73,198

1. El Orito is a silver-base metal sulfide zone, all other deposits are silver-gold oxide zones.
2. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.
3. The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.
4. The Mineral Resources in this news release were estimated in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum (CIM), CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines (2014) prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council and CIM Best Practices (2019).
5. Historically mined areas were depleted from the Mineral Resource model.
6. Approximately 98.9% of the indicated and 91.3% of the Inferred contained AgEq ounces are pit constrained, with the remainder out-of-pit. See tables 4 and 6 for details of the split between pit constrained and out-of-pit deposits.
7. The pit constrained AgEq cut-off grade of 29 g/t Ag was derived from US\$1,550/oz Au price, US\$21/oz Ag price, \$3.66\$/lb Cu, \$0.90 \$/lb Pb, \$1.26 \$/lb Zn, 93% process recovery for Ag and Au, 90% process recovery for Cu, 80% process recovery for Pb and Zn, US\$18/tonne process and G&A cost. The constraining pit optimization parameters were \$2.00/t mineralized mining cost, \$1.50/t waste mining cost and 50-degree pit slopes.
8. The out-of-pit AuEq cut-off grade of 119 g/t Ag was derived from US\$1,550/oz Au price, US\$21/oz Ag price, \$3.66\$/lb Cu, \$0.90 \$/lb Pb, \$1.26 \$/lb Zn, 93% process recovery for Ag and Au, 90% process recovery for Cu, 80% process recovery for Pb and Zn, \$57/t mining cost, US\$18/tonne process and G&A cost. The out-of-pit Mineral Resource grade blocks were quantified above the 119 g/t AgEq cut-off, below the constraining pit shell within the constraining mineralized wireframes and exhibited sufficient continuity to be considered for cut and fill and longhole mining.
9. No Mineral Resources are classified as Measured.
10. AgEq and AuEq calculated at an Ag/Au ratio of 73.8:1.
11. Totals may not agree due to rounding.

Mineral Resource Estimate Methodology – Los Ricos North

A total of 503 drill holes totalling 106,982 metres were used in the Mineral Resource Estimate. The nearest neighbour mean distance between drill hole collars is 23 metres.

P&E Mining Consultants Inc. (“P&E”) collaborated with GoGold personnel to develop the mineralization models, grade estimates, and reporting criteria for the Mineral Resources at Los Ricos North. Mineralization models were initially developed by GoGold and were reviewed and modified by P&E. A total of 21 individual mineralized domains have been identified through drilling and surface sampling. The modelled mineralization domains are constrained by individual wireframes based on a 29 g/t AgEq cut-off.

Mineralization wireframes were used as hard boundaries for the purposes of grade estimation.

A 5m x 2.5m x 5m three-dimensional block model was used for the Mineral Resource Estimate. The block model consists of estimated Au and Ag grades, estimated bulk density, classification criteria, and a block wireframe volume inclusion percent factor. Ag equivalent block grades were subsequently calculated from the estimated Au and Ag grades. The average bulk density by deposit was assigned for the Mineral Resource Estimate.

Assay samples were composited to a 1.00m standard length. Au and Ag grades were estimated using Inverse Distance Cubed weighting of between 4 and 12 composites, with a maximum of 3 composites per drill hole. Composites were capped prior to grade estimation by mineralization domain. Composites were selected within an anisotropic search ellipse oriented parallel to the axes of the modelled domains.

Classification criteria were determined from observed grade, geological continuity, and variography. Indicated Mineral Resources are informed by 3 or more drill holes within 50m.

P&E’s Qualified Persons are of the opinion that the Mineral Resource Estimates are suitable for public reporting and are a reasonable representation of the mineralization and metal content of the Los Ricos North Deposits.

Table 3: Los Ricos Mineral Resources – Los Ricos North (“LRN”) & Los Ricos South (“LRS”)(¹⁻⁷)

Deposit	Tonnes	Average Grade							Contained Metal						
		Au	Ag	Cu	Pb	Zn	AuEq	AgEq	Au	Ag	Cu	Pb	Zn	AuEq	AgEq
	(Mt)	(g/t)	(g/t)	(%)	(%)	(%)	(g/t)	(g/t)	(koz)	(koz)	(Mlb)	(Mlb)	(Mlb)	(koz)	(koz)
LRS Measured	1.1	1.10	152	-	-	-	2.84	249	39	5,464	-	-	-	102	8,917
Indicated:

LRS (Oxide) ²⁻⁶	8.8	0.89	115	-	-	-	2.20	193	253	32,588	-	-	-	626	54,765
LRN Sulfide ¹	7.8	0.06	28	0.11	0.88	1.33	1.55	114	15	7,011	19	151	229	389	28,708
Total Indicated	31.1						1.93	143	439	86,099				1,816	142,573
Measured & Indicated	32.2						1.98	146	478	91,563				1,918	151,490
Inferred:															
LRN Oxide ¹	15.0	0.28	91	-	-	-	1.52	112	136	44,131	-	-	-	734	54,191
LRS (Oxide) ²⁻⁶	3.3	0.88	112	-	-	-	2.17	190	93	11,781	-	-	-	227	19,884
LRN Sulfide ¹	5.5	0.06	28	0.12	0.74	1.20	1.46	108	11	4,888	15	90	146	258	19,007
Total Inferred	23.8						1.65	122	240	60,800				1,219	93,082

1. See Table 1 notes for assumptions
2. See GoGold press release #29-2020 dated July 29, 2020 for full details regarding Los Ricos South Mineral Resource estimate.
3. The LRS pit constrained AuEq cut-off grade of 0.43 g/t Au was derived from US\$1,400/oz Au price, US\$16/oz Ag price, 93% process recovery, US\$18/tonne process and G&A cost. The constraining pit optimization parameters were \$2.00/t mineralized mining cost, 1.50/t waste mining cost and 50-degree pit slopes.
4. The LRS out-of-pit AuEq cut-off grade of 1.4 g/t Au was derived from US\$1,400/oz Au price, US\$16/oz Ag price, 93% process recovery, \$40/t mining cost, US\$18/tonne process and G&A cost. The out-of-pit Mineral Resource grade blocks were quantified above the 1.4 g/t AuEq cut-off, below the constraining pit shell and within the constraining mineralized wireframes. Out-of-Pit Mineral Resources are restricted to the Los Ricos and Rascadero Veins, which exhibit historical continuity and reasonable potential for extraction by cut and fill and longhole mining methods.
5. No out-of-pit Mineral Resources are classified as Measured at LRS.
6. AgEq and AuEq calculated at an Ag/Au ratio of 87.5 for LRS.
7. Totals may not agree due to rounding.

CAUTIONARY STATEMENT:

The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws, and may not be offered or sold within the United States or to, or for the benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except in compliance with the registration requirements of the U.S. Securities Act and applicable state securities laws or pursuant to exemptions therefrom. This release does not constitute an offer to sell or a solicitation of an offer to buy of any of GoGold's securities in the United States.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, the Los Ricos projects, future operating margins, future production and processing, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral project. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.

Important factors that could cause actual results to differ materially from GoGold's expectations include exploration and development risks associated with GoGold's projects, the failure to establish estimated mineral resources or mineral reserves, volatility of commodity prices, variations of recovery rates, and global economic conditions. For additional information with respect to risk factors applicable to GoGold,

reference should be made to GoGold's continuous disclosure materials filed from time to time with securities regulators, including, but not limited to, GoGold's Annual Information Form. The forward-looking information contained in this release is made as of the date of this release.
