**GoGold Releases Q3 2024 Financial Results**

**Halifax, NS – GoGold Resources Inc. (TSX: GGD) (OTCQX: GLGDF) (“GoGold”, “the Company”)** is pleased to announce the financial results for the quarter ending June 30, 2024. The Company generated revenue of \$10.4 million (all amounts are in U.S. dollars) from the sale of 365,119 silver equivalent ounces.

“During the quarter, we passed 10 years of continuous production at Parral. We constantly make efforts to optimize our operations and congratulate the team on completing 10 years of production,” said Brad Langille, President and CEO. “We feel that the next decade plus of growth in GoGold lies within our flagship Los Ricos district, with the immediate catalyst being the release of the results of our definitive feasibility study in September at Los Ricos South. During the engineering work for the feasibility study we have redesigned the mine plan to have a bulk underground operation for at least the first decade of production. We are confident that we will be issued an underground permit and therefore are preparing to execute on long lead time items such as construction of a power line and paying deposits for certain major components.”

Highlights for the quarter ending June 30, 2024:

- Cash of \$76.4 million USD
- Revenue of \$10.4 million on the sale of 365,119 silver equivalent ounces at a realized price per ounce of \$28.37 per oz
- Production of 400,236 silver equivalent ounces, consisting of 138,708 silver ounces, 2,436 gold ounces, 148 copper tonnes, and 125 zinc tonnes
- First sale of zinc precipitate from SART zinc expansion
- Adjusted cash cost per silver equivalent ounce of \$18.54
- Adjusted all in sustaining cost per silver equivalent ounce of \$24.59

Following are tables showing summarized financial information and key performance indicators:

<b>Summarized Consolidated Financial Information</b> <i>(in thousands USD, except per share amounts)</i>	<i>Three months ended Jun 30</i>		<i>Nine months ended Jun 30</i>	
	<b>2024</b>	<b>2023</b>	<b>2024</b>	<b>2023</b>
Revenue	\$ 10,358	\$ 8,485	\$ 26,097	\$ 24,570
Cost of sales, including depreciation <sup>1</sup>	4,590	6,272	17,173	28,796
Operating income (loss) <sup>1</sup>	3,600	245	1,869	(10,149)

#### CAUTIONARY STATEMENT:

The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws, and may not be offered or sold within the United States or to, or for the benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except in compliance with the registration requirements of the U.S. Securities Act and applicable state securities laws or pursuant to exemptions therefrom. This release does not constitute an offer to sell or a solicitation of an offer to buy of any of GoGold's securities in the United States.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, the Los Ricos project, future operating margins, future production and processing, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral project. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.

Important factors that could cause actual results to differ materially from GoGold's expectations include exploration and development risks associated with the GoGold's projects, the failure to establish estimated mineral resources or mineral reserves, volatility of commodity prices, variations of recovery rates, and global economic conditions. For additional information with respect to risk factors applicable to GoGold, reference should be made to GoGold's continuous disclosure materials filed from time to time with securities regulators, including, but not limited to, GoGold's Annual Information Form. The forward-looking information contained in this release is made as of the date of this release.

*Cautionary non-GAAP Measures and Additional GAAP Measures*

Note that for purposes of this section, GAAP refers to IFRS. The Company believes that investors use certain non-GAAP and additional GAAP measures as indicators to assess mining companies. They are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared with GAAP. Non-GAAP and additional GAAP measures do not have a standardized meaning prescribed under IFRS and therefore may not be comparable to similar measures presented by other companies.

Additional GAAP measures that are presented on the face of the Company's consolidated statements of comprehensive income include "Operating income (loss)". These measures are intended to provide an indication of the Company's mine and operating performance. Per ounce measures are calculated by dividing the relevant mining and processing costs and total costs by the tonnes of ore processed in the period. "Adjusted cash costs per ounce" and "Adjusted all-in sustaining costs per ounce" are used in this analysis and are non-GAAP terms typically used by mining companies to assess the level of gross margin available to the Company by subtracting these costs from the unit price realized during the period. These non-GAAP terms are also used to assess the ability of a mining company to generate cash flow from operations. There may be some variation in the method of computation of these metrics as determined by the Company compared with other mining companies. In this context, "Adjusted cash costs per ounce" reflects the cash operating costs allocated from in-process and dore inventory associated with ounces of silver and gold sold in the period. "Adjusted cash costs per ounce" may vary from one period to another due to operating efficiencies, grade of material processed and silver/gold recovery rates in the period. "Adjusted all-in sustaining costs per ounce" include total cash costs, exploration, corporate and administrative, share based compensation and sustaining capital costs. For a reconciliation of non-GAAP and GAAP measures, please refer to the Management Discussion and Analysis dated August 7, 2024 for the three months ended June 30, 2024, as presented on SEDAR.
