**GoGold Reports Quarterly Production at Parral of 406,150 Silver Equivalent Ounces**

**Halifax, NS – GoGold Resources Inc. (TSX: GGD) (OTCQX: GLGDF) (“GoGold”, “the Company”)** is pleased to report production for the quarter ending September 30, 2024 of 406,150 silver equivalent ounces, consisting of 167,001 silver ounces, 2,232 gold ounces, 132 tonnes of copper, and 100 tonnes of zinc.

“The quarter yielded continuing production growth, and more importantly we saw a substantial increase in production in the month of September where the heap achieved equilibrium at a level generating significant free cash flow for that month. The addition of the zinc circuit, along with other optimizations, has not only paid off in a saleable zinc product and recycling of the associated cyanide, but also it appears that it has improved the leaching of gold and silver,” Brad Langille, President and CEO stated. “As we complete final engineering and anticipate the issuance of our permit for the Los Ricos South underground mine, we see Parral adding meaningfully to our cash flow on a go-forward basis.”

The securities described herein have not been, and will not be, registered under the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), or any state securities laws, and may not be offered or sold within the United States or to, or for the benefit of, U.S. persons (as defined in Regulation S under the U.S. Securities Act) except in compliance with the registration requirements of the U.S. Securities Act and applicable state securities laws or pursuant to exemptions therefrom. This release does not constitute an offer to sell or a solicitation of an offer to buy of any of GoGold's securities in the United States.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, the Los Ricos project, future operating margins, future production and processing, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral project. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.

Important factors that could cause actual results to differ materially from GoGold's expectations include exploration and development risks associated with the GoGold's projects, the failure to establish estimated mineral resources or mineral reserves, volatility of commodity prices, variations of recovery rates, and global economic conditions. For additional information with respect to risk factors applicable to GoGold, reference should be made to GoGold's continuous disclosure materials filed from time to time with securities regulators, including, but not limited to, GoGold's Annual Information Form. The forward-looking information contained in this release is made as of the date of this release.
