Option grant date	<u>Dec. 27, 2022</u>	<u>Dec. 30, 2021</u>
Options granted	1,450,100	1,030,500
Exercise price	CAD \$ 2.25	CAD \$ 3.25
Risk-free rate	3.37%	1.30%
Expected volatility of share price	66%	65%

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2023

(Unaudited – in thousands of United States dollars unless otherwise stated)

Expected dividend yield	0.00%	0.00%
Expected life of each option	5 years	5 years
Weighted average grant date fair value	CAD \$ 1.19	CAD \$ 1.58

The expected volatility was determined based on the historical share price volatility from the date of the grant over a period of time equal to the expected life of the option. The expected forfeiture rate for all grants was nil. The options granted on December 27, 2022 were granted through the Omnibus Plan, which allows settlement of the option either by the issuance of common shares, cash, or a combination thereof, at the election of the Corporation. As the Corporation does not have a stated intent of which settlement method will be used, the options were accounted for based on past practice, whereby all options have been settled through the issuance of shares.

### (e) Deferred share units

The Corporation's Omnibus Plan allows, and DSU Legacy Plan allowed, DSU awards which entitles the participant to receive one common share of the Corporation issued from treasury upon redemption. DSUs typically vest over a 3-year period from grant date, although the vesting period is at the Board of Directors' discretion. DSUs issued under the Omnibus Plan allow settlement of the DSU by the issuance of common shares, cash equal to the market value of the common shares at settlement, or a combination thereof, at the election of the Corporation. As the Corporation does not have a stated intent of which method will be used, the DSUs issued on December 27, 2022 were accounted for based on past practice, whereby all DSUs have been settled through the issuance of common shares.

The changes in DSUs for the nine months ended June 30, 2023 and 2022 were as follows:

	June 30, 2023	June 30, 2022
Opening balance	4,862,500	4,722,500
Granted	235,000	140,000
Closing balance	5,097,500	4,862,500

### (f) Restricted share units ("RSUs")

The Omnibus Plan allows for, and the RSU Legacy Plan which was approved on December 30, 2021 allowed for, the award of RSUs as an alternative form of compensation for employees, officers, and directors of the Corporation. Each RSU entitles the participant to receive a cash payment equal to the value of one common share of the Corporation on the vesting date, which

(Unaudited – in thousands of United States dollars unless otherwise stated)

is to be made within 30 days of vesting of each RSU. RSUs under the Legacy Plan are required to be settled in cash, while RSUs under the Omnibus Plan can be settled by the issuance of common shares, cash, or a combination thereof, at the election of the Corporation. As the Corporation does not have a stated intent of which method will be used, the RSUs issued on December 27, 2022 were accounted for based on past practice, whereby all RSUs have been settled by cash. RSUs typically vest and become exercisable over a 3-year period from the grant date, with one-third vesting on each of the first, second and third anniversaries of the grant date.

The changes in RSUs for the nine months ended June 30, 2023 and 2022 were as follows:

	June 30, 2023	June 30, 2022

### (h) Net income (loss) per share

Basic net income (loss) per share is calculated based on the weighted average number of shares outstanding during the year. Diluted net income (loss) per share is based on the assumption that stock options and DSUs have been exercised on the later of the beginning of the period and the date granted. For the three months ended June 30, 2023, Nil DSUs and Nil options (2022 – Nil and Nil, respectively) and for the nine months ended June 30, 2023, 5,019,167 DSUs and 4,848,186 options (2022 – 4,816,346 and 6,882,344, respectively) were excluded from the computation of diluted net income per share because their effect would have been anti-dilutive. Following is a reconciliation from the weighted average number of shares outstanding to the diluted weighted average number of shares outstanding:

### 9. SEGMENTED INFORMATION

The Corporation's reportable segments are consistent with the Corporation's geographic regions in which the Corporation operates. In determining the Corporation's segment structure, the Corporation considered the basis on which management reviews the financial and operational performance and whether any of the Corporation's mining operations share similar economic, operational and regulatory characteristics. The Corporation considers the Parral project and the Los Ricos project as the Mexico segment, and the Corporation's corporate offices as the Canadian segment.

### 10. FINANCIAL INSTRUMENTS

(a) Fair value of financial instruments:

The following table provides the disclosures of the fair value and the level in the hierarchy for financial instruments valued at fair value through profit or loss on a recurring basis.

	June 30, 2023		September 30, 2022	
	Level 1	Level 2	Level 1	Level 2
Long-term obligations	-	\$ 1,848	-	\$ 2,472
Derivative liabilities	-	1,105	-	745

Long-term obligations are valued based on the discounted present value of the future cash flows.

Derivative liabilities are valued at fair value through profit or loss on a recurring basis. For both, the Corporation performs valuations internally and calculates a debt valuation adjustment or a credit valuation adjustment by considering the risk of non-performance by the counterparties and the Corporation's own credit risk. Valuations are based on forward rates considering the market price, rate of interest and volatility, and take into account the credit risk of the financial instrument, and are therefore classified within Level 2 of the fair value hierarchy.

(b) Capital management:

The Corporation's objective when managing capital is to maintain adequate levels of funding to support the acquisition, exploration and operation of resource properties and maintain the necessary corporate and administrative functions to facilitate these activities. These activities are primarily funded through operations, equity financing or debt. Potential future financings are dependent on market conditions and there can be no assurance the Corporation will be able to raise funds in the future, should the need arise. The Corporation invests all capital that is surplus to its immediate operational needs in high interest savings accounts.

The capital of the Corporation consists of items included in shareholders' equity and debt, net of cash as follows:

	<u>June 30, 2023</u>	<u>September 30, 2022</u>
Shareholders' equity	\$ 285,627	\$ 240,331
Less: cash	(98,718)	(73,344)
	<u>\$ 186,909</u>	<u>\$ 166,987</u>

(c) Financial risks:

The Corporation's financial risk exposures and the impact on the Corporation's financial instruments are summarized below:

*Commodity price risk*

The profitability of the Corporation's mining operations is significantly affected by changes in the market price for silver, gold and copper ("Metal"). Metal prices fluctuate on a daily basis and are affected by numerous factors beyond the Corporation's control. The supply and demand for Metal, the level of interest rates, the rate of inflation, investment decisions by large holders of Metal including governmental reserves, and the stability of exchange rates can all cause significant fluctuations in Metal prices. Such external economic factors are in turn influenced by changes in international investment patterns and monetary systems, and political developments.

*Credit Risk*

The Corporation's credit risk is primarily attributable to cash, input tax recoverable and trade receivables. Input tax recoverable consists of harmonized sales tax due from the Federal Government of Canada of \$55 and value added tax ("VAT") receivable from the Federal Government of Mexico of \$19,980. Timing of collection on VAT receivables is uncertain as VAT refund procedures require a significant amount of information and follow-up. The Corporation assesses the recoverability of amounts receivable at each reporting date. Changes in these estimates can materially affect the amount recognized as VAT receivable and could result in a change in net income. As at June 30, 2023, the Corporation determined the full balance to be recoverable. Significant judgment is required to determine the presentation of current and non-current input tax recoverable. Exposure on trade receivables is limited as all receivables are with two customers who the Corporation has a strong working relationship with and are reputable large international companies with a history of timely payment. Management believes the risk of loss with respect to financial instruments consisting of cash, input tax recoverable and trade receivables to be low.

*Foreign Currency Risk*

The Corporation's major purchases are transacted in Canadian dollars ("CAD"), US dollars ("USD"), and Mexican Pesos ("MXN"). The Corporation funds certain operations, exploration and administrative expenses in Mexico using USD and MXN currency converted from its CAD and USD bank accounts. Excess cash is held predominantly in USD, although also held in CAD and MXN based on future spending requirements. The Corporation's subsidiaries in Mexico have a functional currency of USD, and therefore net monetary assets held in MXN in those entities are affected by foreign exchange fluctuations and will affect the Corporation's net income. At June 30, 2023, the Corporation had net monetary assets in MXN of approximately \$17,371 (September 30, 2022 – \$17,758), for which a 10% change in MXN exchange rates would change net income by approximately \$1,737.

## NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2023

(Unaudited – in thousands of United States dollars unless otherwise stated)

As GoGold Resources Inc., the parent corporate entity, has a functional currency of CAD, net monetary assets held in USD are affected by foreign exchange fluctuations recorded through the Corporation's net income. At June 30, 2023, GoGold Resources Inc. had net monetary assets in USD of \$88,985 (September 30, 2022 – \$56,144), for which a 10% change in US exchange rates would change net income by approximately \$8,898. As the Corporation's reporting currency is USD, these changes to net income attributed to fluctuations in the US exchange rates would be offset by an equal opposite change to other comprehensive income. Net monetary assets held in CAD by the parent corporation are affected by foreign exchange fluctuations recorded through other comprehensive income. At June 30, 2023, the parent corporation held net monetary assets in CAD of \$8,564 (September 30, 2022 - \$9,689), for which a 10% change in CAD exchange rates would change other comprehensive income by approximately \$856.

### *Interest Rate Risk*

The Corporation has cash balances and the current policy is to invest excess cash in Canadian bank high interest savings accounts and GICs. Excess cash is held in USD, CAD, or MXN based on future spending requirements and consensus foreign exchange estimates. Fluctuations in market interest rates could impact the amount of interest income earned on funds held in savings accounts. The Corporation has no interest bearing liabilities.

### *Liquidity Risk*

The Corporation's general objective when managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2023, the Corporation had cash balances of \$98,718, current input tax recoverable of \$1,272, and trade receivables of \$3,804 for settling current liabilities of \$11,159, and therefore liquidity is expected to be sufficient to fund the operations of the Corporation for the next twelve months.

### (d) Derivatives:

The Corporation, through its subsidiary Coanzamex, has an agreement with the Municipality of Parral, Mexico ("Town") to mine and process tailings material for precious metal recovery. The Corporation makes payments of \$48 per month to the Town which increases based on the average market silver price, with payments continuing until tailings are completely mined. As the monthly royalty payment increases based on the average market silver price, from a minimum of \$48 per month to a maximum of \$88 per month, the variable payment portion of the obligation is accounted for as an embedded derivative liability. The fair value of the liability has been accounted for using a Monte Carlo simulation based on the spot price of silver at June 30, 2023 of \$22.47 (September 30, 2022 - \$19.02), as well as the historical volatility of silver market prices. The fair value of the derivative liability under this method at June 30, 2023 was \$1,105 (September 30, 2022 - \$745).

## 11. COMMITMENTS

The Corporation has the following minimum annual cash payment commitments for the next five years:

Description	2024	2025	2026	2027	2028
Minimum royalty and land payments – Parral (Note 10(d))	\$ 570	\$ 570	\$ 570	\$ 570	\$ 570
