GoGold Announces Parral Expansion that is Expected to Double Throughput and Releases First Quarter Production

Halifax, NS, January 18, 2016 - GoGold Resources Inc. (TSX: GGD) (“GoGold”, “the Company”) reports that this quarter the Company is focused on increasing production at Parral through an expansion of both the stacking circuit and the Merrill-Crowe processing facility (the “Parral Expansion”). The Parral Expansion will be completed this quarter and will result in the ability to double the ore processing to 10,000 tons per day. The capital for the Parral Expansion of \$10 million will double throughput representing a significant return on investment. This increased throughput will result in lower unit costs and increase our future operating margin.

“We are confident that the expansion will result in a significant increase in production, which we will start to see the effects of this quarter,” said Brad Langille, newly appointed CEO and President. “The Company continues to selectively spend capital on projects with the highest return on investment.”

The Company also reports production from the Parral heap leach facility in Chihuahua, Mexico of 231,353 silver equivalent ounces at a cash cost of \$6.54 per silver equivalent ounce for the quarter ending December 31, 2015.

GoGold expects to produce 350,000 to 400,000 silver equivalent ounces this quarter with continued production growth going forward.

This news release may contain "forward-looking information" as defined in applicable Canadian securities legislation. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Parral tailings project, future operating margins, future production and processing, the anticipated benefit of the Parral Expansion and the financial return thereof, the completion of the Parral Expansion in the time frame and at the expected cost, and future plans and objectives of GoGold, constitute forward looking information that involve various risks and uncertainties. Forward-looking information is based on a number of factors and assumptions which have been used to develop such information but which may prove to be incorrect, including, but not limited to, assumptions in connection with the continuance of GoGold and its subsidiaries as a going concern, general economic and market conditions, mineral prices, the accuracy of mineral resource estimates, and the performance of the Parral Expansion. There can be no assurance that such information will prove to be accurate and actual results and future events could differ materially from those anticipated in such forward-looking information.

Important factors that could cause actual results to differ materially from GoGold's expectations include exploration and development risks associated with GoGold's projects, the failure to establish estimated mineral resources or mineral reserves, volatility of commodity prices, variations of recovery rates, and failure to complete the Parral Expansion on time and budget and global economic conditions. For additional information with respect to risk factors applicable to GoGold, reference should be made to GoGold's continuous disclosure materials filed from time to time with securities regulators, including, but not limited to, GoGold's Annual Information Form.
