### GoGold Reports Record Quarterly Production of 580,711 Silver Equivalent Ounces, Exceeding Previous Record by 29%

---

Halifax, NS – GoGold Resources Inc. (TSX: GGD) (OTCQX: GLGDF) (“GoGold”, “the Company”) is pleased to report record production for the quarter ending September 30, 2019 of 580,711 silver equivalent ounces, consisting of 326,625 silver ounces and 2,921 gold ounces, representing an increase of 29% from the previous quarter and previous record of 451,011 silver equivalent ounces.

Production for the fiscal year ending September 30, 2019 was 1,846,835 silver equivalent ounces, consisting of 1,059,438 silver ounces and 9,149 gold ounces. This represents an annual record and is an increase over the prior year record of 42%, or 547,421 silver equivalent ounces.

“This marks the third consecutive quarter where we’ve set a production record, with a substantial increase this quarter of 130,000 ounces from the past quarter, in what has typically been our weakest quarter of the year due to the rainy season,” said Brad Langille, President and CEO. “This has been by far our strongest year at Parral, with production of 1.85 million ounces, over 500,000 ounces higher than last year. With Parral running at these rates, the exceptional results that we’re seeing at our Los Ricos project, and the strengthening of the gold and silver markets, it’s an exciting time for us as we work to build value for our shareholders.”

#### SART Update

Construction on the SART continues to be on schedule, with the foundation and significant concrete work completed, and many key components being installed. Construction is scheduled to be completed prior to the end of 2019. The SART plant is expected to bring important economic and technical benefits to the Parral facility. The main economic drivers are the recovery of a high-grade saleable copper sulfide product, the re-generation of cyanide, which is the largest single operating cost at Parral, and the improvement of the leaching efficiency of the heap.
